PROJECTS

Portfolio Website

The portfolio page is a very well-designed and user-friendly website that demonstrates my skills as a frontend developer. It is well laid out, with sections highlighting my professional skills, completed projects, and contact information. It communicates effectively about my web development skills, creative problem-solving abilities, and commitment to delivering quality work

Student Result Management System

Developed and implemented a Student Result Management System that is aimed at automating the management of student academic records. It includes secure user authentication, result entry, automated grade calculation, and detailed performance analytics. The system supports result publication, generates customizable reports, and integrates communication tools for teachers, students, and parents. Designed with scalability, data privacy, and system security to enhance the accuracy, efficiency, and accessibility of student performance tracking for educational institutions.
